WHO WE ARE

<https://twinspace.etwinning.net/96905/home>

Description

6 secondary schools' priority of fighting against discrimination preventing bullying and violence results in a new point of view called "who we are".

everyone wants to believe that "sticks and stones may break my bones, but words will never hurt me". But for some children and teens that's not true. Words can be just as harmful, or even more so, than physical abuse. This project is a challenge for us because discrimination, intolerance, aggressive personality are always the main problems that we must overcome and develop.

ERASMUS + MEDIA

<https://twinspace.etwinning.net/84426>

description

This Project has been born from the interest and enthusiasm to create a Mass Media Corporation and go beyond frontiers. In order to do so, the project involves 4 main activities: the creation of documentaries about local products, podcast promoting local music, cultural videos about local artists and reports about the education in the different countries we want to visit.

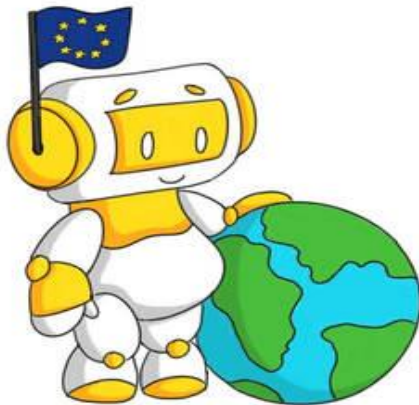

We also want to raise awareness on the importance and power of information and information literacy and make of our students autonomous learners and foster their creativity

Humanoid Robots for a future World

<https://twinspace.etwinning.net/80807>

Description

Robots - especially humanoid robots - are and will be used in future as service robots, guides, companions and many more applications. The demand for intelligent humanoid robots is exploding.

This is the official Homepage of the EU-funded project, operated by 6 partner schools from Austria, Greece, Italy, Turkey, Portugal and France.

On The Move For Social Inclusion

<https://twinspace.etwinning.net/71797/home>

Description

Inclusive education is a central issue to the achievement of high quality education for all learners and the development of more inclusive societies. It is essential to achieve social equity and it is a basic element of lifelong learning. This project will give our schools a significant help to promote inclusiveness, address equality and give our students equal opportunities to promote themselves at school, local community and future professional environment. We want to create the best opportunities to see how other countries and schools face the contemporary common challenges and to start cooperating with them. The cooperation with peers of different languages and cultures will play a key role in enhancing social cohesion and intercultural dialogue. This partnership will give way to a shared route which will lead to the promotion of Social Inclusion at all levels: Five steps to break SOCIAL PREJUDICE, to foster EQUALITY, to promote INTEGRATION and INCLUSION.
